

## **DISTANCE LEARNING**

### ***Teaching Social Skills to Youth in Behavioral Health Care***

- This course is intended to provide students with essential skills to support youth in behavioral health care in acquiring social skills necessary for successful interactions. Students will learn and apply effective communication skills; demonstrate an understanding of Learning Theory; identify factors that promote or inhibit behaviors; and demonstrate basic crisis prevention and intervention skills.

### **STARTING IN LATE SPRING**

- The very first class is face to face with your instructor
- A 30 hour practicum is also included so that students can apply their newly acquired knowledge.
